DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: it does not comply with MPEP § 608.01(m) that requires each claim to begin with a capital letter and to end with a period. The capital letters should not be used in the body of the claim except for names. See *Fressola v. Manbeck*, 36 USPQ2d1211 (D.D.C. 1995). Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. **Claim 2** is rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling separately for the permanent magnet embedded in one of the gears and the permanent magnet fixed around the shaft of the motor, does not reasonably provide enablement for simultaneously for both, the same magnet embedded in the gear and around the shaft of the motor. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. **Claim 1** is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2834

The following are examiner's suggested changes to improve the clarity of the claim:

In line 7, after "shaft" delete "3" and "a fan" should be --said fan--, in line 8 delete "Characterized by", in line 12, delete ", not on,", in line 14, replace "HALL IC" with -Hall effect element--.

Allowable Subject Matter

6. **Claim 1** would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

The feature of the fan having the permanent magnet imbedded in one of the gears and the Hall effect element activated by the magnetic field of the magnet for the purpose of detecting the rotating speed of the motor, in combination with the other limitations present, are neither disclosed nor taught by the prior art of record.

Prior Art

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
